UTAH IN REVIEW

Utah's Economy

Utah's economy continues to grow at rates well above the national average. For the last three years, Utah nonagricultural employment has grown at an annual rate of 3 percent or better, one of the best job growth performances in the nation. By comparison, the nation has had an average growth rate of only 1.6 percent during this time. Though the Utah performance is exceptional, the national recession has affected the state. Utah's nonagricultural employment growth rate has slowed each of the last three years. In 1990, Utah employment grew by 4.7 percent, in 1991 it slowed to 3 percent, and from May 1991 to May 1992 the growth rate was 2.4 percent. However, even this slower growth rate from May 1991 to May 1992, places Utah among the top 10 states in the nation and much better than national empioyment, which actually shrank 0.3 percent.

Another measurement of Utah's economy, total personal income (TPI), grew to an estimated $25.9 billion an increase of 7 percent from 1990. This was down slightly from the 1990 TPI growth rate of 8.6 percent, but nearly twice the growth rate of the nation. Utah's performance for the remainder of 1992 and in to 1993 depends on how well the national economy does. Current projections from state economic coordinating committee for 1992 are for an employment growth rate of 2.5 percent and a personal income growth rate of 7.2 percent.

State Government Finances

The national recession has deeply affected state government finances across the country. Thirty-five states are reducing their fiscal year 1992 budgets by a total of $5.7 billion and raising taxes by $15 billion in order to balance. In addition, governors are requesting an additional tax increase of $5.1 billion for fiscal year 1993. By comparison, Utah's fiscal year 1992 budget will likely balance or show a slight surplus with no general tax increases or budget cuts.

For fiscal year 1993, the Legislature appropriated approximately $3.9 billion to finance state operations, an increase of $105.7 million or 2.8 percent. The appropriation included no general tax increase, though a few user fees were raised. The fiscal year increase of 2.8 percent is much lower than the 9.4 percent increase in 1992 and the smallest increase since fiscal year 1988.

For the last 40 years, five expenditure categories have received the vast majority of the state budget. Fiscal year 1993 is no different, almost 80 percent of the total budget went to the following areas: public education 35.1 percent, health 13.1 percent, higher education 12.1 percent, social services 10.1 percent, and transportation 9.4 percent. Within these dominant categories, some shifting has taken place. Social services and public education have been increasing as a percent of the total budget while transportation has been reduced the most.

Economic Development

Economic development has been one of the areas of great emphasis in state and local government and among Utah's business leaders for the past several years. As a result, new initiatives have been created to help Utah companies expand and to bring other companies to Utah. The latest of these initiatives is the Industrial Assistance Fund, a $10 million incentive fund that loans money to companies that can increase business activity in Utah by certain levels.

Initiatives and Referendums

An initiative affecting state and local government finances and Utahns in general, may appear on the November election ballot. This initiative would provide for pari-mutuel betting in counties that pass such ordinances. Currently all forms of gambling are against the law in Utah.

The 1991 legislature passed legislation allowing local governments to authorize a referendum on a proposal to raise the sales tax by 1/4 percent to fund a "fixed guideway (light rail) and expanded public transportation system." This November, Salt Lake County voters will vote on this issue. Seventy-five percent of the new revenue would be earmarked for the light rail and expanded public transportation system and 25 percent for "renovation, repairs, and improvements" on Interstate 15.

Population

Utah's population continues to grow at a rate above that of the nation. Utah's July 1, 1991 population is estimated at 1,775,000, an increase of 2.7 percent. This is the fastest growth rate since 1982 and the first time the state has experienced net in-migration since 1983. Between 1984 and 1990, the state experienced a net out-migration of almost 60,000. However, as the economy improved, out-migration fell, and in 1991 Utah experienced a net in-migration of almost 19,000.

Utah's growing population is also becoming more urban. In 1990, 87 percent of all Utah residents lived in urban areas, making the state the sixth most urban in the nation. The concentration of Utahns into fewer areas is best understood by looking at county population trends. Between 1940 and 1990 the state's population grew by 1,224,790, 84.5 percent of that increase occurred in Salt Lake, Utah, Davis, and Weber counties. When Cache and Washington counties are added to the above four Wasatch Front counties, 91.4 percent of the state's population growth is accounted for.

National Recognition

Between 1989 and 1992, Utah has received substantial recognition from the national media. Such major sources as U.S. News & World Report, Fortune, Financial World, Money, Time, The Wall Street Journal, and others have written positively about Utah. The recognition can be grouped in to three main areas. First, the state and its communities are praised for the quality, quantity and availability of its workforce. Second, state and local governments were praised for their clean water, low crime, short commute time, quality of life, good airport, and excellent highways. State government was recognized for its AAA bond rating, keeping government expenditures in line with revenues, having a rainy-day fund, prompt payment of bills, and a sound pension plan. Third, state and local governments were praised for working closely with companies looking at expansion and helping existing companies to expand in Utah.

Tax Burden

Utah's state and local tax burden remains above the national average. In fiscal year 1990, state and local taxes were 12.2 percent of personal income, placing Utah 11th in the nation. Nationally, state and local taxes amounted to 11.5 percent of personal income, while the mountain states average was 11.9 percent. On an income of $35,000 a Utah resident would pay approximately $269 more per year than the person with a tax burden equal to the national average and $115 more per year than a person with a tax burden equal to the average of the mountain states. During the 1980s, Utah's state and local government tax burden has fluctuated between 7th and 16th in the nation.

The main reason for this relatively high tax burden is the state's young population. Almost 27 percent of Utah's population is between the ages of 5-17. No other state has a school-age population that is as large a percent of its state population. The national average for school-age population is only 18 percent. Another way of looking at this is with a dependency ratio (number of school-age children per 100 working age adults - ages 18-64). Utah's school-age dependency ratio is the highest in the nation at 48 school-age children per 100 working age adults and 65 percent above the national average of 29.

Conclusion

Though Utah's state and local governments are in good condition when compared to most other state and local governments in the country, the state is not without serious challenges. State government is facing significantly increasing demands in the area of social services, especially in health care services and in corrections. Higher education's high growth rates will also be a major issue for the 1990s. The state's infrastructure, especially roads, are also a major area of concern. Threatening the state's ability to deal with these issues is a national economy that has been unable to sustain a recovery from a serious recession.

Still, Utah is fortunate. The state's economy has performed very well in comparison to the rest of the states and has actually improved over the last few months. State government, by national standards is one of the best managed in the nation. The state's local governments have serious challenges, but again by national comparisons are managing them better than most. The state remains very attractive to business, both in and out of the state because of a good work force, good work environment, and relatively good infrastructure.

* Excludes expenditures for administration and for social services.

** Beginning in January 1974, money payments for old-age assistance, aid to the blind, and aid to the disabled were paid directly by the Federal Social Security Office.

Prior to fiscal 1962, medical assistance expenditures were not separated. Such medical expenditures are included in respective program expenditures for these earlier years.

* Individual categories add to more than the total because some were receiving assistance under more than one program.

** Does not include old-age recipients, blind recipients, and disabled recipients who were receiving money payments through the Federal supplemental security income program. These adult assistance categories were transferred to the Federal Social Security office on January 1, 1974.

Cases eligible for medical assistance only. Due to the Omnibus Budget Reconciliation Act of 1989 the number of cases has increased dramatically because of new eligibility guidelines.

NOTE: For taxing purposes, the appraised market value is discounted by 40% in the case of primary residential property and by 20% in the case of other locally-assessed real property to determine the assessed value that is subject to taxation. Above percentages are calculated from the appraised market value before discounts and other adjustments.

* The sample size is five or less, therefore, the data is not statistically significant and is not included in countywide data.
